

SMARTE STOCK MANAGEMENT

WAREHOUSING & LOGISTICS

"REAL-TIME OPERATIONAL EXCELLENCE"

FLEX SMARTE SOLUTIONS-

FLAWLESS EXECUTION THROUGH DIGITAL MASTERY

We will help you to maximise your organisation's Return on operational Assets (RooA). This means that we enable you to operate your assets as effectively and efficiently as possible, while also ensuring they are healthy and safe. In this way, you reduce your operational costs and risks, becoming far more profitable as a result.

We can achieve this through one or more of our six "smaRTE solutions" that have been built using a combination of our leading-edge, digital technologies and are focused around our "Real-Time Operational Excellence (RTE)" mantra.

OPTIMAL STOCK MANAGEMENT

A great product is only as good as its supply chain

You've got a great product, customers want it and you're able to make it at a cost that lets you generate an attractive profit. That's a great start for any business. But storing and distributing your stock is just as important to your company's success.

Logistics is a major contributor to your competitive edge

The larger you get, the more important logistics become. Understanding the main objectives of storing and distributing your product will help you maximize your chances of remaining competitive.

Achieve optimal stock management

The ultimate objective of stock warehousing and logistics is to optimise order fulfilment while minimising stock costs, maximising cash flow, and eradicating shrinkage. To achieve this, you should ensure you can quickly and accurately locate, count, pick and dispatch your stock. Additionally, you should ensure that you are neither over, or understocked. Too much stock will tie up working capital unnecessarily. On the contrary, too little stock will result in lost sales. The ability to ensure and prove that what you dispatch from the warehouse, arrives at the destination as planned is also a component of your success.

THE SMARTE SOLUTION:

3. Operational Technology Cyber Security

1. Stock Accuracy

2. Stock Track and Trace

THE OPERATIONAL BENEFITS:

- Improved stock-on-hand accuracy to 99%.
- Reduce receiving and dispatch times by 80%.
